PROGRAMMING LANGUAGES

- Python

TOOLS

- Git, Github, Vercel

FRONTEND TECHNOLOGIES

- HTML, CSS, Bootstrap,

BACKEND

- Flask, MySQL

SKILLS

- Problem Solving, Adaptability, Willingness to Learn

PRODUCTIVITY TOOLS

- MS-Word, Excel, Powerpoint

LANGUAGES

ENGLISH

TELUGU

HINDI

PROJECTS

FACE MORPHING DETECTION USING DEEP LEARNING (Final Year Academic Project)

Published in IJRASET, Vol. 13, Issue III, March 2025

- Developed a hybrid face morph detection system combining **Haar Cascades**, **Alpha Blending**, and **OpenCV-based pixel comparison**, improving detection accuracy to over **95%**, even under varied conditions (lighting, expression, accessories).
- Built a **secure Django-based web application** that verifies user authenticity during facial login and blocks access when morphing is detected.
- Trained and evaluated the model using **eight real-world facial databases** (e.g., FGNET, FEI, FERET), enhancing robustness across age, illumination, and face diversity.

FORMULA 1 BLOG USING HTML [↗](#)

- Developed a static blog on **Formula 1** using pure **HTML**, showcasing structured content and well-organized sections.

PAYTM CLONE USING HTML & CSS [↗](#)

- This project is a static **Paytm Clone** built using **HTML and CSS**. It replicates the layout and design of the original Paytm website while ensuring responsiveness and proper element alignment.

OLA CLONE-HTML & CSS [↗](#)

- This project is a static **Ola Clone** built using **HTML and CSS**. It replicates the layout and design of the original Ola website while ensuring proper alignment of all elements.

SNM-APPLICATION [↗](#)

- Developed a Simple Notes Management (SNM) web application **using Flask**, enabling users to **create, edit, and delete** personal notes. Implemented **clean UI** and **efficient data handling** to ensure a **smooth and responsive user experience**.
